

W) Workshops

W1) Field Health Examiner Course

Canadian College of Healthcare and Pharmaceuticals is a Toronto-based Private Careers College registered under the Ontario Private Career College Act of 2005. We offer the Field Health Examiner (FHE) program to integrate into health insurance industry.

About:

Field Health Examiners (FHE) are agents hired for performing health exams of prospective and existing insurance clients seeking life, critical illness or other insurance products. FHE job is to document the previous medical history, brief physical exam, and blood and urine sampling.

About our program:

The Canadian health insurance industry has grown enormously since 2000s. This growth offers new but challenging opportunities for healthcare professionals who are looking for full time, part-time, flexible job options. FHE is a comprehensive program of paramedical examination for life and critical care insurance. This training permits you to be job ready for these specific positions in this growing industry. It trains you in essential procedures and protocols of health examination of existing and prospective insurance clients.
